**Re: In the Matter of the Application of SolarCity for Adjudication Not a Public Service Corporation: Docket No. E-20690A-09-0346 (Track 2)**

Chairman Mayes and Commissioners:

After reviewing Judge Rodda's recent Recommendation regarding the above matter, and the subsequent amendments submitted by Commissioners Pierce and Mayes, AriSEIA would like to express its support for the arguments made by Pierce and Mayes that SSAs should *not* be regulated as Public Service Corporations.

However, AriSEIA also has two concerns that it would like to note:

First, given the similarity between the Pierce and Mayes amendments, we are of the opinion that these amendments are similar enough that we feel either amendment will address the industry's concerns (subject to our second comment below). The most important step is to now arrive at a speedy resolution without engaging in an extended debate over details that may not be germane to the real issue at hand.

Second, AriSEIA believes that whichever amendment is finally accepted, it should include *all* types of customers rather than just schools and governments, since the arguments made in the amendments against regulation ought to apply regardless of customer status, whether for-profit, or not-for-profit.

We hope that the Commission will take these comments into consideration and resolve this matter once and for all, to the benefit of the solar industry as well as the large number of potential SSA customers in Arizona.

Sincerely,

Lee Feliciano  
President

Arizona Solar Energy Industries Association

Arizona Corporation Commission
